

Fire-Zone™

Puts the "Burn" in Burn-Down!

When you need extra firepower for an application that takes no prisoners, put Fire-Zone in your spray tank. This unique blend of methylated seed oils and surfactants is designed exclusively for burn-down, desiccation and industrial weed control applications.

Fire-Zone gives you the adjuvant firepower to get peak performance from burn-down herbicides. It should be your adjuvant of choice if you want to leave nothing to chance.

Fire-Zone™

- **Optimized for use in burn-down and desiccation applications**
- **Faster weed killing response**
- **Works well under adverse conditions**
- **Disperses well in cold water**
- **Flexible application—ground, air, CDA**
- **Compatible with all glyphosate formulations**
- **DO NOT USE IN OVER-THE-TOP APPLICATIONS**
